SUBJECT: RSPA-03-15327 (HM-206B)

Dear Sir:

This letter responds to the rulemaking notice of June 11, 2003. In general, Diversified CPC International supports the proposed changes save the following comment:

Paragraph 2.2.6.5 from the 2001 edition of NFPA 58, Liquefied Petroleum Gas Code, has required that effective January 1, 1996, all ASME storage containers that contain unodorized LP-Gas products be marked **NOT ODORIZED** in letters 4 in. (10 cm) in height with a contrasting background surrounded by a ½ in rectangular border. Markings shall be located on either both sides or both ends of the container.

The mark **NOT ODORIZED** on ASME storage containers of unodorized LP Gas provides the same important information to emergency responders as discussed in Docket RSPA-03-15327 (HM-206B).

As a shipper of unodorized LP Gas products, Diversified CPC has recognized the merit in the above, thus many of our cargo tank transports are already marked as **NOT ODORIZED**.

In order to remain consistent with the current Liquefied Petroleum Gas Code, Diversified CPC proposes modifying the requirement to require marking **NON-ODORIZED** for LP Gas that does not contain an odorant to marking them **NOT ODORIZED**.

Thank you for the opportunity to comment on this rule making. Should you have any questions, or require further information, please do not hesitate to call or write.

Best regards,

William E. Madigan
Diversified CPC International
